Wonderful product, October 29, 2007

By aviator22 from Cazenovia, NY

"I use this adapter all the time.

It's especially helpful when used with my dump trailer. I can pickup the trailer, set it down, load it, pick it up again, move it elsewhere and dump it all without leaving the tractor seat.

It's also helpful when trying to get my big 25 foot trailer into tight spots - the tractor is so much more maneuverable than a pickup.

I use mine with a quick hitch for fast installation and removal."

Owner, October 8, 2007

By tsuits from Canajoharie, NY

"I have four trailers and it makes it so much easier to go from one to another. I leave it hooked to my tractor most of the time. It is real easy to take off and put on. Saves a great deal of time."

Makes Life Easier, July 10, 2007

By Aggie from Texas

"This product allows me to connect to different implements for my tractor without all of the hassle, lifting, pulling. Because I can adjust the height of the hook up with my tractor, I am able to tow my camper and trailers around my lot with no readjustments from the farm implements."

Good Equipment, July 9, 2007

By Alan05 from Washington

"This hitch adapter was exactly what I thought it would be. Works perfect and allows trailer hook ups using the 3 point lift instead of getting off of the tractor and manually lifting the trailer or cranking the trailer jack down to the tractor.

Much better than using the tractor tow bar."
