

3-Point Tractor Hitch

Haul behind your tractor what you've been towing behind your truck or SUV with FLEXpoint®

The FLEXpoint Tractor Hitch System fits Category 1, 2 & 3 tractor brands with a 3-point hitch system. Just remove the towing insert from your truck receiver, insert into the 2-1/2" square FLEXpoint receiver tube, then use your tractor's rear 3-point hydraulics to easily adjust receiver height to raise or lower your trailer. The FLEXpoint patented design harnesses the power of the triangle to give you optimal towing capacity and accepts pin, pintle, ball hitch, gooseneck inserts and much more. All our hitches are hand-welded in Maine and come with a sturdy black powder coated finish. To date, we have shipped in excess of 30,000 units nationwide, and we guarantee customer satisfaction!

The FLEXpoint® allows you to pull virtually any kind of heavy load

- utility trailers
- boat trailers
- wood splitters
- golf course equipment
- horse & stock trailers
- salt & manure spreaders
- gooseneck trailers
- and so much more!
